Why Did Obamacare Copy Bernie Madoff

Health insurance companies and the Democrats that created Obamacare learned a valuable lesson from PONZI Master: "Bernie Madoff."

"So Long As You Give People Back a Little Bit of Their Money in Return, They Do Not Notice That You Are Robbing Them Blind."

Many people pay for insurance, or Christian health shares and report that they are very happy with their plans. Why? Because the insurance company allows its customers to visit a doctor and only pay a $50 co-pay.

A 50-year-old in Orlando pays $600 a month for insurance premiums and she is happy because she only paid $50 for a visit that will cost less than $200.

She gave the insurance company $7000. They give her $200 back and she is overjoyed.

Bernie Madoff and Charles Ponzi could not have done better.

Health insurance is designed to cover THE BIG STUFF

Examples: if you get cancer, can you go out-of- network? Are you stuck with their treatment model? Are you limited to their drugs?

If you're in the hospital, will you be billed thousands of dollars for balance billing? This is the hospital charging more than the insurance company allows?

Does the insurance company deny coverage because it is experimental in the USA?

Will the insurance company negotiate a small discount when you are below your deductible and co-pay and then receive a large kickback which you do not benefit from?

You only know if you are truly happy with your insurance, when you ask for more money than you put in, to pay a claim, and the insurance company gives it to you.

Paying back a few pennies is how Bernie Madoff stole billions.

Alan J. Huber CFP® is the Director of Freedom From Obamacare and has decades of expertise in health insurance. He advocates and offers NON-Obamacare insurance alternatives. He also trains Republicans and Conservatives in "Use of Sales techniques to WIN Arguments and Convert Liberals."
