Healthcare.....Was the #1 issue in the 2016 midterms.

Healthcare... The only real issue where Democrat messaging is better than Republican messaging.

Healthcare... An issue of real importance for every American

What is Alan's brilliant strategy to win on the healthcare issue in 2020?

"DO NOTHING"

Let me repeat:

"DO NOTHING"

Right now we have the best of all worlds:

A) The poor receive free healthcare through Medicaid

B) Low income workers receive huge subsidies through the health insurance exchange

C) The critically ill and uninsurable have their pre-existing conditions covered.

D) Those who pay high premiums are free to shop and save money on the private market since the tax penalty was eliminated.

Does this mean that health insurance really works now in the United States?

Of course not. But it is stable enough to leave alone and watch how the American public reacts

Sometimes the best thing to do is wait, watch and analyze. Let's give the healthcare system a chance to settle out and see what the American people actually do.

If the public drops their insurance or complains that there are no providers in their area, then we can address this in 2021. .

By waiting and watching we will learn what actions the public takes in regards to their own healthcare.

Most important, this strategy forces the Dems to attack their beloved Obamacare.

Sometimes doing nothing is the best course of action.
