

Health Insurance Easy Fixes Nobody Believes

As a health insurance consultant, I am amazed at people's misconceptions. Much of it is understandable. If Trump does anything good, the media will make it sound bad.

Example: if I am asked, "How much is a health insurance policy?"

My correct answer is: "How much do you want to pay?"

In most of the United States minimum auto insurance coverage is \$50 per month. However, most everyone reading this, pays well above the minimum because they CHOOSE added protections.

Since carrying health insurance is no longer required by law. it is similar to auto insurance, As a result, you are free to purchase any coverages you want or choose to go without any health insurance. However, most of my readers are not comfortable having ZERO health insurance.

There are many options between having no health insurance and a high premium, high deductible ACA plan (Obamacare). Some insurance companies are offering premiums, 50% off ACA, with low or no deductibles. Keep in mind, there are shortfalls, such as: health qualifications, no coverage for maternity care, or no drug or alcohol rehab.

One of the most important reasons for having some health insurance is reducing the hospital bill via repricing. A \$45,000 medical debt is not manageable for most people. If this bill is repriced to \$15,000 and paid out over a number of years, it is now manageable.

Pres. Trump and the Red State governors are giving you options. Are you taking advantage of them?

I am available to answer your questions and look at your options.
