

Climate questions that freak liberals

By: Alan J. Huber

As I previously wrote, if you try to deny climate change no matter how valid your argument they will call you a denier and end the conversation.

It matters not that you have all the facts, climate change is religion to millennial's,

How shall we proceed? Let's use the liberals favorite arguments against them.

“If Americans have to reduce their carbon footprint, why are you giving the 1% a free pass?”

Example DiNero, DiCaprio, Al Gore, all own multiple houses, private planes, yachts etc.

Liberals will tell you that they will pay a carbon tax to offset their excessive use.

You must ask: “does this promote income inequality?” A \$50,000 tax to DeNiro whose net worth is \$300 million is peanuts.

Adding a \$500 surcharge on your U-Haul rental to a \$40,000 wage earner may keep them from moving and bettering their life.

It's easy for the super-rich to support climate change solutions.

“Their lifestyle is not affected”

Make them give up 2 of 3 houses and fly commercial and the 1% will fund studies that climate change is not so bad.

Rich people should not be exempt from saving the planet because they are rich and can afford it. If the average person is going to hurt , then the rich should hurt much more.

Fun Fact

in past 21 years we have impeached half of our presidents
