

Why Do Trump Supporters Bury 45s Greatest Accomplishment?

By: Alan J. Huber

Some of the major accomplishments for our 45th president include:

- Mideast Peace
- No War Consuming the World
- Destroy ISIS
- Keeping America Safe
- Economy so strong it survived the COVID crisis.

But his greatest accomplishment, history will remember him for, gets buried by his biggest supporters.

“The COVID Vaccine”

Many Trump supporters lead the anti-mask and anti-vaxx brigades. All of us have friends who post on social media: **“I’m never taking the vaccine.”**

That’s great! Don’t take the vaccine! This is your choice.

But this vaccine will save millions of lives around the world and, you should want President Trump to take the credit.

Be honest.... Don’t you laugh at all the Trump haters that voted him out of office, fighting to be 1st online to get that injection that only Donald Trump could have brought to fruition, in less than ONE year.?

“Trump never did anything for real Americans” they would say, while they wait on the vaccination line.

If you want to screw with their heads, just say: "OMG, I can't believe you're taking the Trump vaccine? You really think he was capable of getting the vaccine out in less than a year and it is safe?"

Don’t you know that vaccine is his greatest accomplishment?”

They will mumble something about scientists and reliable companies and run away from you as fast as they can.

Here is something you do not know. **“Donald Trump will be credited with curing cancer”**

The mRNA technology in the vaccine was created 20 years ago as a cancer cure. Unfortunately, it was so far out of the mainstream, bringing it to market was not considered financially feasible.

With COVID, there were no financial limits from the government, so tons of money was put into research to develop the vaccine. This research will now be used to create cancer cures in just a few years.

Click this link for more information: <https://www.beckershospitalreview.com/oncology/covid-19-vaccine-could-jump-start-cancer-treatment-breakthroughs.html>

Summing up: it’s okay not to take the vaccine, but make sure Donald Trump gets credit for creating it so quickly. No bureaucrat could have accomplished the impossible.
