

## **With Friends like Us Who Needs Democrats?**

Operation Warp Speed has proven tremendously successful. 21% of the US population has received at least one shot. That is 108 million doses.

It is so good that the White House claims Donald Trump had nothing to do with it. Instead of correcting the record, Conservatives respond to every social media thread with: "the vaccine is experimental I will never take it," or "you cannot sue if the vaccine hurts you."

Folks, if you do not want to take the vaccine, don't take it. That is still your right, and Liberals are taking your spot in the vaccine line at every opportunity.

But by talking about life insurance policies will not pay if you die, and there are microchips etc., you are hurting Donald Trump's political game plan.

His political future rests on the steps he took with the virus. Shutting travel. Getting PPE. Deploying hospitals. And most important, making the vaccines reality, thereby eradicating the virus worldwide when no one else had a solution.

Liberals are signing up for the vaccine at nearly 100%. Therefore, your warnings are having zero effect on them.

Instead, remind them that Trump is the reason their life is returning to normal and the future looks bright. If we don't, we create a vacuum that is being filled by the lies of Joe Biden.

Remember? Trump is creating a dangerous vaccine that is not safe? That was Biden and Harris. Do you really want to be agreeing with them?

Again, don't take it, but stop dissing it. By now, most Americans know where to look for data, and your latest memes, are not convincing them, they are just hurting our side politically.

In case you forgot? Joe Biden is the enemy! He wants to keep Americans scared and in chains. President Trump through Operation Warp Speed has freed America from COVID and Fauci. And pretty soon, no one will wear a mask anymore, and that will be because of Donald Trump, not Joe Biden giving them permission.

### **When people try to compare Biden to Trump all you need to say is:**

**"All Joe Biden has offered is wearing masks. Donald Trump has given the world the vaccine."**

And you can whisper "I still won't take it."
