

Why The Wrong Medicare Plan Can Cost You Your Life

**By: Alan J. Huber

Have you noticed every other commercial is about Medicare plans? This is because starting October 15th people on Medicare can enroll or make changes to their Medicare Advantage and drug plans.

I need a legal disclaimer here. As Medicare is a government program, insurance agents face restrictions on what they are allowed to say. This column is written as a political commentator, and I claim all rights and protections afforded to Americans via the First Amendment of the United States Constitution.

But the politicization of COVID has given an urgency to plan selection that has never before existed.

We know that receiving early pre-hospital treatment such as Hydroxychloroquine / Ivermectin / Regeneron/ etc. is often the deciding factor on whether or not you become hospitalized and possibly die from COVID or recover quickly.

Finding a physician that will prescribe these treatment regimens has proven to be very difficult.

Many times, I was involved in helping infected people (many of them my insurance clients) find physicians to prescribe these alternatives. This was not easy. I and others kept clandestine lists, knowing the government was trying to impede medical professionals offering these alternatives.

Call or email me.

855-561-0500 or alan@rethinkhealthinsurance.org

(Please see my insurance ad below.)

So for the first time, your life depends on you choosing a doctor who cares first and foremost about your health, and not some loyalty to an insurance company, a political agenda or a state medical board.

Keep in mind the usual caveat. **People with money need not worry because they can pay out-of-pocket for whatever medical care and treatments they need.**

Seniors, on fixed incomes often do not have that luxury. They go where their insurance company sends them.

As an example: I have been shocked by the number of seniors that schedule back surgeries, but will not try chiropractor to avoid the knife. **The response is often:** "but my insurance pays for the surgery, not for the chiropractor."

It is hard to imagine choosing invasive surgery before trying an alternative treatment for \$500, BUT, reality is.....on fixed income \$50 can be difficult. Let alone \$500

So the less able you are to pay a few hundred dollars out-of-pocket for an appointment with a hydroxychloroquine / ivermectin friendly physician, the more you need to look for a Medicare Advantage plan that does not penalize you for choosing out-of-network providers.

Medicare.gov allows you to look at ALL plans in your area. If you have any difficulties navigating the website, feel free to call on my office.
