

Biden Rules: Okay for White People to Die from COVID

**By: Alan J. Huber

If you live in New York State, and get COVID you might die because of slavery.

This is serious. Medical treatment is being prioritized based on being a member of a minority group. The courts will have fun with this, but if you cannot break Democrats away from the party with this information, then we have a problem.

Repeating.....White people may be denied medication by order of NY State. This decision has the blessing of the White House.

Only 16% of Americans get their news from cable news networks.

If half of them watch Fox News, that is only 8%.

So where do the rest of the fake news watchers get their information from?

This totally destroys the liberal narrative, because all they know is: **"Fox News BAD."**

Comparing January 6th to 9/11. Giuliani orders 10,000 body bags. Nancy needed ONE.

Comparing 1/6 to Pearl Harbor? The World War II Memorial shows over 400,000 American soldiers killed.

Only the dumbest Vice President in history can conflate the 2 events. This should be an insult to every veteran and their family in America.

Gov. DeSantis uses the term **"Corporate Media"** to describe the MSM.

Trump coined : "Fake News."

While Trump is right, his error is not realizing that when someone has invested years in a product, they defend the product.

Could be: mayonnaise, deodorant, or a car brand.

If they have been watching ABC News for 30 years, calling it fake will receive the same response as telling a devout Christian that Jesus is fake.

This is an important point to remember.

When arguing with someone on social media, do not respond when they post an article. Tell them to cut and paste the facts they are relying on. This usually ends the argument, because most of them have never read the article. They just read titles.

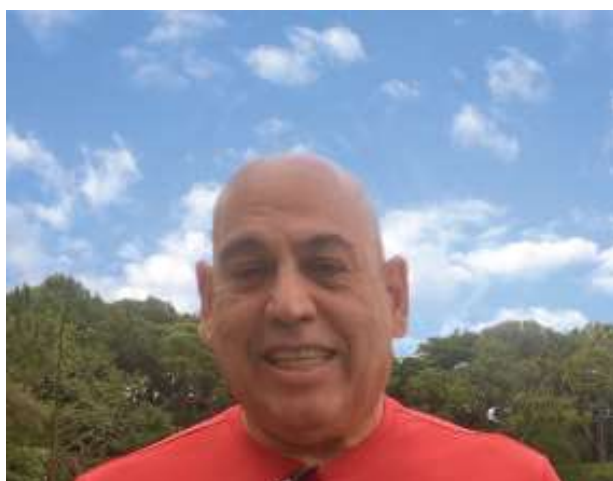

This will save huge amounts of time.

Another gift from the left. Justice Sotomayor saying that 100K children are seriously ill w/ COVID shows what happens when you get your information from MSM.

Thank you Justice for proving what we already knew.
