

U.S. spent \$1 Billion to do what Survey Monkey could have done for \$10,000

You will not get the healing effects of matzo ball soup if you make it vegetarian, ie: no chicken. To make the best chicken soup you should use a kosher chicken. Why? Because the chicken does not know it is going to die and therefore is not afraid before it is slaughtered.

Elon Musk: 40% of the calls to Social Security are from fraudsters trying to change the bank account that the money is deposited to.

Elise Stefanik is taking herself out of the UN Ambassador position, because Trump's not sure they can win the seat. She will go back into House leadership.

I don't understand it. Another someone asked if I would change seats with them on the airplane, and I said no. It happens a million times a day and becomes a big deal for no reason. Either switch seats, or don't, but you don't need to tell the world.

Another headline: 9 million students about to get credit report problems. These are students or graduates that had student loans that haven't been paid in four or five years due to COVID. They knew when the grace period expired, it would go on the credit report. They didn't pay, so the credit reports are showing this. You would think this was done without notice.

President Trump on what is a woman?

A woman is someone that can have a baby under certain circumstances. A woman is a person who is much smarter than a man. A woman is a person that doesn't give a man even a chance of success.

NBC ABC and CBS did not even cover the hearings of the NPR and PBS bosses in front of Congress. But Signal gate was nonstop.

Illegals can still file tax returns for their children to get earned income credit although they're not allowed to work. I think the Trump administration should grab all the refunds, have the people come to a place to pick them up and deport them.

The Palestinian who led the Gaza protest has been executed by Hamas.

This is one of the reasons why there are no protests in Gaza.

Pennsylvania just passed the law to mimic Obamacare.

People under age 26 get to keep their parent's health insurance. They don't realize what that's done, is made people incredibly dependent. Instead of becoming an adult, they will stay children .

The difference in generations.

When I was youngster we knew everything.

Every restaurant, every store, what time they would open, when they closed and what they offered. I was at Jacksonville Airport, I couldn't find the Thrifty counter. I asked multiple people at Avis, they didn't know. They are in the same airport. A difference in the generations.

The same airport, my flight's delayed. I asked the lady at the airline counter what time the restaurants closes. She had no idea. This isn't a big airport.

If people knew what was going on around them, life would be a lot better.

Elon Musk says 2.1 million non-citizens received social security numbers in 2024. How many green card applications were there. When you apply for green card, you get your social security number first, then a few months later you get a green card interview.

It appears 1.1 million green cards were issued. So some of the cards will be legitimate and some will probably be fraud

US Consulate offices worldwide have been directed to vet student visas. They were instructed to access the social media accounts and look at any anti-American writings. This is a good thing.

Trump signed an Executive Order that the federal government must faze out paper checks by September 30th. This is wonderful news. Getting us into the 20th century before the 21st century is 25 years old.

An example of what DOGE will do. A person that immigrated to the United States and has applied for Medicare. They have to attach their naturalization form to the application. Then a real person has to go and match it up. What DOGE will do is have the immigration database talk to Medicare database and in one second match it up. That will also make many jobs redundant.

The Atlantic runs a story about a person that was deported to El Salvador. They interviewed his attorney who said: "The man's never been in trouble in his life." Of course an immigration judge found that he is a member of MS-13 and a threat to the community. Amazing what happens when you carry half a story.

I had people contacting me panicking about Florida's 6th Congressional District. The polls say we're going to lose, I heard. At the close of early voting, Republicans were up four points. That should have told everyone, what they needed to know. Randy Fine won by 14 points.
