This will be my last newsletter of 2025. Headed on a cruise and then straight into the holidays. Merry Christmas, Happy Hanukkah, and a phenomenal New Year to all of you. See you in 2026 — election year baby!

Maybe for only the second time in history, Israel is actually praising a UN Security Council vote. The Security Council just endorsed a postwar plan for the Middle East after Gaza. How do you know it was good? Because Israel didn't reject it — Hamas rejected it outright.

Implementing the plan now falls to Trump's "Board of Peace," not the United Nations. Thank God.

Only in America can a kid wear \$150 sneakers, sip an \$8 coffee, and post about being oppressed from a \$1,200 iPhone while claiming capitalism has failed them.

How to stop "I.C.E. incidents"? The next time one happens, confiscate the phones and cameras of every single person filming it. Tell them, "You'll get it back in three days." Now we have legitimate, chain-of-custody evidence." Do that a couple of times and watch how fast people get tired of not having their phones taken and stop filming everything. Problem solved.

**Terror attack outside Jerusalem:** two terrorists were shot dead after trying to carry out a suicide bombing. The father of one of them said: the thing he looked forward to most in life was becoming "the father of a martyr." Golda Meir nailed it decades ago: "Peace will come when the Arab's love their children more than they hate us." Instead of a death penalty, maybe we should start cremating these terrorists and never return the bodies.

Israel wasn't born in 1948. The Jewish presence in that land goes back to 1021 BCE. Israel was liberated from colonial (British) occupation in 1948.

Just saw an old photo of men in suits, ties, and fedoras riding bumper cars at Coney Island. Classy and hilarious at the same time.

Looks like Trump is going to spend 2026 holding massive rallies on healthcare — the smartest possible move and the thing he does better than anyone.

SNAP benefits in nine states can now be used to buy prepared meals at fast-food restaurants. This costs taxpayers \$475 million last year. On the other hand, try feeding the homeless hot meals... Big Macs aren't the answer?

Judges telling federal agents they cannot use any force to effect an arrest is comical, if it weren't so dangerous. I've watched the videos. If an agent uses excessive force, prosecute that individual case. Blanket bans on force are ludicrous. An appeals court already smacked that nonsense down.

Donald Trump and JD Vance were not invited to Dick Cheney's funeral. The horror — how will they sleep at night?

Hamtramck, Michigan — the city that previously required Pride flags on public buildings — just voted unanimously to ban them. Why the flip?

Because the city council is now majority Muslim and refuses to fly LGBT flags on government property.

**Great question of the week:** What actually makes somebody "trans"?

All the countries that spent the last year screaming "genocide" about Israel are now quietly sending military delegations to learn from the IDF how Israel wages pinpoint warfare with minimal civilian casualties. Poland, Germany, the UK, Japan — all the usual suspects who spent decades lecturing the Jews — are suddenly very eager students. The irony is thicker than oatmeal.

Minnesota taxpayers appear to be the largest single funders of the Al-Shabaab terrorist group through massive daycare fraud. Thank you, Governor Tim Walz.

Marjorie Taylor Greene is reportedly resigning from Congress after her recent attacks on Trump. Where does she think she's going — The View? CNN? She just guaranteed she'll be as popular as Liz Cheney in the GOP.

**HURRY:** 5 days left in Obamacare open enrollment. Private plans regardless of pre-existing conditions are available.

Everything you heard about health insurance premiums are true. Call Alan today to see your options.

**Medicare open enrollment enrollment is here** of income are available.

Want prices to come down fast? Everyone takes a pay cut. Don't want a pay cut? Then don't complain when prices stay high. Energy will

come down no matter what; labor-driven costs won't, without wage pressure.

ICE arrested 400 illegal immigrants in the Charlotte area — half with serious criminal records. That is exactly what 74 million of us voted for.

I was asked what the close election in Tennessee means for the Republicans. It means the Republicans have to get their messaging together.

Affordability, Immigration, and Democrats are nuts. Focus on this and you win the midterms. Let the Media decide what they're going to write, and you will lose.

The return to Obamacare subsidies have shown what the real premiums of

Obamacare are and they are horrifying to those in the upper income. In most states

we have great private plans available. Call me to discuss.

**Meme of the Week:** If you are applying for job at Hooters, they give you a bra and say: "Just fill this out."

What happens when a communist dictator visits the White House and Trump praises him? The left loses their minds.

**Social Security in one**

**statistic:** By age 67 I will have

had over \$600,000 paid into the system on my behalf. At a modest 5% return that would

be worth \$1.9 million today and throw off \$95 k a year in

interest. The government promises me \$37 k. That, ladies and gentlemen, is why government should never run

retirement plans.

A man lived here legally 30 years, committed PPP loan fraud, served his time, and was deported to Haiti upon release. The left is outraged he was "dehumanized" and flown back in handcuffs. Sorry he didn't get first-class upgrades.

**Supreme Court myth:** No single justice can "reinstate" or "block" anything long-term.

They can only issue a temporary administrative stay until the full court votes — usually within days or weeks.

Stop acting like one justice is a king.

**Question for my pro-life**

**friends:** If life begins at conception and a woman

miscarries at 6, 15, or 30 weeks, does she have every

right to feel completely

devastated — like her baby died and part of her life's

meaning is gone? Just asking.

**Another deportation sob**

**story:** Woman brought here at age 10, deportation order

signed in 2004, never left, now finally removed to Vietnam.

Play stupid games, win stupid prizes.

Ford Motor Company has 5,000 job openings paying \$120,000+ a year. They can't find qualified applicants. But we're told the illegal who can't

read or write in any language is "doing jobs Americans won't do."

**New York Times headline of the week:** "Voters Stand With Marjorie Taylor Greene" — accompanied by a photo of people literally standing behind her at an event. Could she actually win re-election right now? Obviously not, but never let a good photo op go to waste.

**Liberal debate tactic:** "I want ten peer-reviewed sources that confirm my feelings!"

Reality: You got jammed in a parking lot with a stranger holding a Dunkin' bag and you still couldn't change his mind over a free donut.

Thanksgiving meal prices are actually down this year — another "Biden inflation" narrative collapses.

**Dem's in 2021:** "Soldiers must refuse illegal orders!"

Soldiers: "Like the COVID shot mandate?" Dem's: "No, not that one!"

Remember when polls said Republicans would get blamed for a government shutdown? Latest numbers: Only 8% blame Republicans, 35% blame Democrats. The longer these things drag on, the worse it gets for the party of government.
