

History is Now Fluid... This Leads to Misinformation

By: Alan J. Huber

A video of a college student: “I work harder than Elon Musk. I have to keep my grades up.” This is why she will never amount to anything.

Polls show a majority of Americans against the war in Iraq. As soon as the war is over, which should be another week or two, the numbers will strongly reverse.

You don’t try to build support for a war this short in the middle of the war — you build support after the war. And the administration cannot spend time rallying America because they are busy fighting a war.

One of the problems facing Israel and the Jewish people is revisionist history, especially in books in Arab lands. In 1948 the world started a war with Israel. Five Arab countries attacked Israel trying to destroy it. Israel won. Revisionist history now says the Arabs welcomed the Jews with open arms and the Jews tried to kill the Arabs. Israel has to find some way to combat this.

Here’s the part about government people don’t get: The government knew the courts were going to get rid of the tariffs. They knew they had alternatives.

Why did they wait? If they had implemented the alternatives immediately, they wouldn’t have to give back all the money they collected.

How real is the threat from Iran? They have cluster bombs. They are using cluster bombs, which is a war crime. If they develop a ballistic missile that reaches the United States, they could hit us with cluster bombs, which are very difficult to defend against.

Will AI kill jobs? If used properly, AI will put American blue-collar workers hard at work, because it will do the thinking for them and make them more efficient.

Let me break down the Israeli / American attacks on the IRGC: Surrender or die.

If you need help surrendering, ask the French. They are better at it than anyone.

Source in Tehran hospital: Every person that has come in here has been linked to the regime. In 10 days, not a single civilian has been hurt.

If you’re not going to shut the New York airports and you run business as usual, the DHS problem will never be solved. How about: “Shut the Senate down.”

No business should be transacted in the Senate until the DHS funding issue is solved.

Here is the problem. If you watch Al Jazeera, you see bombings in Saudi Arabia and the Arab Emirates, and they say Israel is doing the bombing instead of Iran.

Federal judges are appointed for life. But what happens if a judge becomes too old or incompetent? Short of impeachment, the Constitution says nothing. A 98-year-old federal judge is suing because the other judges will not let her hear cases.

The case may go to the Supreme Court, and the justices will decide what happens.

Remember I suggested that the government give tariff money back to the people. There is now a class-action lawsuit against Costco for return of tariff money. My idea made the most sense.

Thursday night headline: “Armed FBI agents carry out...” Have you ever seen an FBI agent who isn’t armed?

It’s all about the question. When asked: “Do you approve of Trump using the U.S. military to eliminate Iran’s nuclear missile program?” 51% approve, 41% disapprove. If you only ask about military action, the numbers reverse.

People are upset that Trump refers to Iran as: “Not a war.” The reason is to avoid the constitutional question of the War Powers Act. An excursion is not a war. This way he does not have a 60-day time limit. The War Powers Act may be unconstitutional, but that would take at least a year for the Supreme Court to decide.

Many of us grew up with the World Book Encyclopedia or Encyclopedia Britannica. That fixed history. It was settled.

Unfortunately, for almost two generations, history has become fluid, and that is why there is so much misinformation.

Allegedly, a person who does not speak good English was driving an 18-wheeler and killed a father and son and put the mother in the hospital in Ohio.

A couple in Israel did not have a bunker, so they had to go to a public bunker a few minutes away.

They were woken up by sirens every few hours for four nights in a row. One night they decided to go to the bunker before the sirens went off.

They took a shower, went to the bunker, went to sleep cuddling, and the sirens never went off all night. For them, that became a perfect night. That is the reality of Israel.

There is a \$53 Billion Gulf pledge to rebuild Gaza. As I said, in order to rebuild Gaza, you’re going to have to get the Palestinians out of there, and that will achieve world peace.

The anti-America crowd will not be happy until a heavy explosion happens somewhere in the United States.

Then they may realize they are on the wrong side of everything.

People ask: “Is God still in the miracle business?” Israel is a very densely populated country the size of New Jersey.

How do Iranian missiles get blown out of the sky and fall into empty spaces, over and over again? These are miracles.

Am Yisroel Chai — the Children of Israel live.

Iran is now down to using a first lieutenant as spokesman for the regime.

In Iran, they would rape girls in prison before executing them because Islamic law forbids executing virgins.

The left mourns the death of the Ayatollah and celebrates the death of Charlie Kirk. This is the world we live in.

It seems that Trump was using Tucker Carlson to pass false information to the IRGC, which now could expose Tucker to criminal charges.

Couldn’t happen to a nicer person.

The U.S. is basically oil-independent under Trump. Other countries are not rushing to send the military to protect ships through the Strait of Hormuz.

Back-channeling, Trump will tell other countries that the easiest thing for the U.S. to do is blow up Iranian oil shipping. Other countries don’t want that, especially China, so they will quickly create a coalition.

“Gayatollah” — the new nickname for the possibly dead leader of Iran, because the CIA is reporting that he is gay.

I guess “Queers for Palestine” were onto something.

If NATO countries do not help Donald Trump, he may pull the U.S. out of NATO.

Think about this: NATO is afraid to get involved in a war with Iran, whose military has already been defeated and has no real capability.

So why should the United States defend them when someone real attacks them? It’s not our problem.

The Washington Post poll shows momentum toward backing the Iran war. More people support it now than when the war started.

Why? Because you cannot hide the fact that America is winning from the American public.

People ask why my column is getting so big. It should only take one minute to read. Unfortunately, in a span of a week there is a lot of news, so my columns reflect that. In a few weeks, I’m sure I can go back to a one-minute issue.

Meme of the Week:
Husband: What’s for dinner?
Wife: Food.
Husband: That sounds good.

Alan’s One Minute Issue™ is written by Alan J Huber, to help right-minded individuals win their arguments with wrong-minded individuals. Alan is available to speak, at: GOP events, Trump clubs and Conservative meetings across the country. Alan is a licensed insurance agent.
