

The World Against Iran

By: Alan J. Huber

855 561 0500

I have been telling you the difference between Year One, and Year Two deaths in the Israel - Gaza war. By the second year Israel got very good at targeting. In the first year **14,000** children died. in the second year, **6,000** children died. And remember they count children till age **18** and you can become a terrorist as young as **12**. In the first year about **8,000** women were killed in the second year only **2,000** women were killed. Israel has the capability of flattening Gaza in a day. This is your proof there was no genocide.

Sadly, you can read a Bible in prison but not in school. Perhaps if they let you read it in school, they will not be in prison.

It's time for the protesters just to turn in their Iran flag for a Cuba flag and protest for the communist regime.

Why do you see Al Jazeera running headlines praising the U.S. and Israel? Is this because a Qatari was killed and Qatar owns Al Jazeera?

Why are the Gulf States not joining in the war? Because they cannot trust the United States for longevity. These are all monarchies. They don't understand elections every four years, and with those elections can come huge swings in U.S. foreign policy. Congress can stabilize that if they wish, but they don't do anything.

They asked the Amish why they're not worried about climate change. Their answer: "We don't have TV."

In the middle of a war, who immigrates to a country that is being attacked? The answer: Jews.

Fifty immigrants from France and Britain arrived this week. They feel safer in Israel than on the streets of France and Britain. That says a lot.

James O'Keefe, who does undercover videos, recorded homeless people, being paid to register to vote at fake addresses.. They get paid to register to vote and sign petitions.

It is amazing the number of people who think that if they flee and pull into their own driveway, the police cannot touch them. They get hit with felony charges for eluding and fleeing, and they are confronted at gunpoint at that time. What's wrong with them?

A man met a woman who said, "My grandmother hated tattoos." I asked her if she also lit candles on Friday night in the basement. She said yes, it was a family tradition. She was shocked to find out people have been doing it around the world for centuries.

There is no difference between men and women? Next time you're at the gas station, look at how a man shakes it after he's finished fueling and how a woman shakes it, and you'll see the difference between men and women.

A word on the filibuster. When the Democrats were in power, people claimed that it was only two Democrats who were against removing the filibuster. That is not true. A lot of Democrats were against it, but two went out on the limb. By the way, they are no longer in the Senate. When, in Trump's first term, they wanted to get rid of Obamacare, it was John McCain who provided the deciding vote. But there were a lot of other people who were against what Trump was doing, and they didn't want to go on the record. McCain took the heat. Understand that this happens, the people who put their neck on the line usually have nothing to lose.

You are a member of the Iran Revolutionary Guard. You get a call on your cell phone from Israel. They tell you that they know everything about you and they can take you out at a moment's notice. What do you do? This is real, and it is happening.

CMS is trying to introduce AI to save money. The problem is, we've all hit zero on the phone and yelled "agent" until we were blue in the face, because AI does not work. It's like sending you to a website that you know does not have the information you're looking for. It's one of the reasons agents are an invaluable component in healthcare.

A full article about a missile strike in Qatar, a major energy hub, and nowhere does it say that the strikes originated in Iran. This is reported on Fox.

In 1982, Woolworth's had **8,000** stores worldwide. Because it tried to be all things to all people, it closed. In 1962, Walmart was formed. They are focused on low prices every day. This focus is what allowed Walmart to be number one?

Three Palestinian women were killed and thirteen wounded when an Iranian missile struck Hebron in the West Bank. The Palestinians are still cheering for Iran.

A long-term solution: There is a pipeline from Saudi Arabia to the Red Sea built during the Iran-Iraq War. Israel has the Eilat-Ashkelon pipeline. This would be transformative — Saudi oil flowing through Israel to the rest of the world.

In one week we'll celebrate the Jewish holiday of Passover. Who would have thought a month ago that all the Middle Eastern countries would be on the side of Israel? They may not be fighting Iran, but they are not defending Iran. And that... is a miracle.

It looks like Qatar is sending the Iranian ambassadors home. A major development, since Qatar and Iran had the best of relations. This shows that in the Middle East, anything can turn on a dime.

The Ukrainians are very popular now because they have had defenses against Russian drones, which were made by Iran. The world keeps spinning.

If the TSA federal unions wanted their people paid and not just to give lip service, they would say:"If we are not open in three days, we will support the Republican candidates in the midterms." Short of this, they don't care about TSA and other affected federal workers.

Shut the New York airports. Still my advice.

A Chicago woman put in paperwork to Social Security for 25 years saying that her mother was alive and collected Social Security checks. She was given one year in prison. And who says crime doesn't pay?

Israel bombed the South Pars gas field. Trump put out a statement that he knew nothing about it. Do you believe that?

The Iranian leadership has been so decimated that the next level of Iranian leadership is Mossad.

The Democrats think the President of the United States was a Russian agent, who later became a Nazi, but is now working for Israel?

And right on schedule, the NATO countries and Japan are figuring out how to keep the Straits of Hormuz open.

Israel reports on Thursday that Iran no longer has the capacity to build any missiles. That means their supply dwindles with every missile fired.

Imagine being Hamas at the moment. Your prime benefactor, Iran, is being disabled, and you'll never get another dime from them. And countries like Qatar and Saudi Arabia are making nice with Israel. Do you believe you missed an opportunity? Which are we closer to: Everybody ignoring the Palestinians, or the Palestinians taking over Israel?

By renaming the Defense Department the War Department, Trump did an amazing job of changing the fundamental reason for its existence.

How to drive a protester crazy: Tell them you are donating money in their name to the IDF.

America is going to unsanction the Iranian oil already at sea and let that stabilize oil prices for a few weeks.

A religious Jew in Israel who speaks Arabic gets someone online who starts off with "**Sieg Heil.**" He asks what that is. They say, "**We love Hitler.**" He asks how to spell it. They say H-I-T-E-L. He asks: "**Why are racists so stupid.**"

If the Democrats in the Senate won't allow DHS funding, then pass it as part of the reconciliation bill with a **\$200** billion Pentagon request as the centerpiece.

Iran fired a missile toward Diego Garcia — that's about **2,500** miles. Everyone thought Iran's maximum reach was **1,250** miles. This reaches all of Europe. Still think it's not your war, NATO?

If everyone in Israel converted to Islam, the conflict would end? Right?? If they became Sunni, the Shiites would try to kill them. If they became Shiite, the Sunnis would kill them. Or ISIS could kill them. Maybe they will stay Jews. It's more fun.

Elon Musk has offered to pay TSA worker salaries.

Twenty-two countries will now help the U.S. bring ships through the Strait of Hormuz. Amazing what happens when they realize they are within Iran's radius of weapons.

160 people were injured in south Israel in an Iran strike. None killed. In World War II, between **50** million and **55** million civilians perished, not including the **20** to **25** million soldiers. This is a reminder of what happens if Iran gets the weapons and the means to distribute them.

Meme of the Week: Marriage is when you both ask what's for dinner and neither of you cooked.

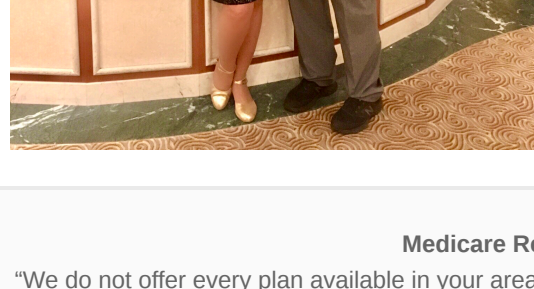

I just finished a 7-month fight with an insurance company to get a client paid on a policy.

They kept saying no, and they were wrong. I gave them everything they wanted — they still said no.

After 8 months of bombarding them with documentation, they sent my client a check.

This never makes it into Yelp reviews, but this is what a good agent is supposed to do.

Call or text **855-561-0500** or email **Alan@HealthPlansMadeSimple.com** 7 days a week.

Alan's One Minute Issue™ is written by Alan J Huber, to help right-minded individuals win their arguments with wrong-minded individuals. Alan is available to speak, at: GOP events, Trump clubs and Conservative meetings across the country. Alan is a licensed insurance agent.
