

What was the Jewish Birth Rate During the Holocaust?

By: Alan J. Huber

What the NYC rent-stabilization freeze means: New York has 57,000 rent-stabilized apartments that landlords keep off the market. Why?

Let's say an apartment needs \$40,000 worth of renovations. The legal rent is \$800 a month, or \$9,600 a year. Would you invest \$40,000 to earn only \$800 a month? That is a money-losing proposition.

What was the Jewish birth rate during the Holocaust? Zero. Pregnant women and babies were slaughtered.

In Gaza, 130 babies are born every day. And they call that a genocide?

The Gulf states don't want to pay American tariffs, but they did call President Trump and offer to invest billions of dollars in the United States. "Invest billions of dollars in the United States?" Trump loves those words.

What political party wrote the Jim Crow laws in the South? Answer: The Democrats.

There is a lot of talk on social media about the Israeli and U.S. militaries merging. Nothing could be further from the truth.

NDA Section 219 concerns defense-intelligence cooperation. Idiots.

It looks like San Francisco's mayor is successfully pushing out the nut jobs and working with moderates.

They beat back a union-led measure that would have raised taxes on large corporations with overpriced, overpaid CEOs. More on this later.

States like New York are starting to ban AI data centers. The solution is for states that have data centers to charge New York much more for access to the data—and prevent people from avoiding the charges by using VPNs that show fake locations.

It seems a Canadian woman hit a girl in New Jersey who was wearing pants displaying the words "Trump" and "ICE." Bet you can't guess who was in the country illegally. She is now being detained at Delaney Hall.

True story: A woman gets into a taxi and tells the driver to turn off the radio because radios did not exist during the time of Muhammad and are therefore forbidden.

The driver stops the taxi and says, "Get out. There were no taxis during the time of Muhammad. Take a camel."

Beirut, Lebanon, in 1970 was the Paris of the Middle East. It was a beautiful, Christian and peaceful country.

Then the Palestine Liberation Organization, which had just been kicked out of Jordan, went to Lebanon and helped start a civil war. Christians were killed, and many had to flee. Israel had nothing to do with it.

The Palestinians destroy everything they touch. Go ask the college morons what they think about this.

In Brevard County, Florida—home of Port Canaveral and its many cruise ships—the sheriff checks cruise passengers for outstanding warrants and arrests them. This is beautiful.

Remember, it is the Democrats who told illegal immigrants to run from ICE. When they run and get killed, whose fault is that?

A young man was selling hats and T-shirts from a table in New York.

Young man: "Capitalism is bad."

Reporter: "Under socialism, they tell you how much you can charge for those shirts.

Can you sell one for \$20?"

Young man: "No."

Reporter: "Now which do you want—capitalism or socialism?"

You cannot make this up.

In Gaza, Israel killed a terrorist. At his funeral, Israel killed five more terrorists.

Thank you, Israel.

Thirty-five million seniors received tax relief this filing season under Treasury Secretary Scott Bessent. This resulted from making Social Security effectively tax-free for many more people.

Ask about this the next time you talk to the old fogies at a protest.

An Israeli Jewish general wanted to build a system that could intercept incoming rockets and missiles. They told him it was a fantasy.

Everyone said he was crazy.

In 2011, it intercepted its first rocket. Iron Dome was real because one man stood against the world and said,

"This is what we need. It's not crazy."

I am putting this issue to bed Saturday night, because I have a conference in Texas beginning Sunday.

It is very simple: If you want to know which side is right and which side is wrong? Israel cherishes life and the Palestinians cherish death. Which side are you on?

An Israeli company has developed a device that is implanted and gradually integrates with the surrounding bone. After approximately 24 months, it becomes part of the bone.

It is called OSSIOfiber. It is being used in foot, ankle, hand and wrist procedures, including bone fusion.

Another incredible medical device from the Land of Israel.

Mamdani keeps squeaking about arresting Netanyahu.

Does he really think a New York City police officer wants to risk getting gunned down by Israeli security forces while attempting to arrest

Netanyahu?

Mamdani just makes noise.

Want a good job? Broward County is hiring school-bus drivers. The county will help train you, which can help you earn your CDL and open the door to many other opportunities.

Why are there openings?

Because TPS has ended for many people.

Meme of the Week

Marriage is finding that special person you want to annoy, for the rest of your life.

CANCER IS DIFFERENT.

Men have about a 1 in 2 chance of being diagnosed with cancer during their lifetime.

Women have about a 1 in 3 chance.

Years ago, you could walk through an airport and see Mutual of Omaha offering travel accident insurance for just a few dollars.

The idea was simple: The insurance company was betting the plane does not crash , and you are betting it does .

Cancer is different.

Cancer is not rare. The odds are real. And the financial impact is often much more than just medical bills.

There can be lost income, travel costs, deductibles, copays, extra help at home, and everyday bills that do not stop just because someone is sick.

Cancer insurance can provide cash benefits that help cover the costs that regular health insurance may not fully handle.

The premiums may be much more affordable than people expect.

Call me and let's discuss whether a cancer plan makes sense for you or your family.
