The Democratic National Committee is so short on cash that it is reportedly asking vendors not to bill it until after the midterm elections. The DNC is also using its headquarters as collateral for a loan.

An Arab and a Druze were talking about 1948.

Arab: "My grandfather was thrown out of Israel."

Druze: "No, he wasn't. He was given the same opportunity to stay, but he chose to leave because Arab leaders promised that the Arabs could sell their houses to Jews, kill the Jews, and then take the houses back. Instead, the Jews won the war with the help of God."

The Arabs refer to this as the Nakba.

All the people yelling "Free Palestine" could help free Palestine by sending Palestinians money. But that is not what the people yelling actually do.

Elizabeth Warren says Congress should pass legislation reinstating Temporary Protected Status. She is right, but that would require Congress to agree on something, and that will never happen.

Congress has the power to correct these injustices and create a system that works. But again, it will not.

It appears that one reason Fauci opposed ivermectin and hydroxychloroquine was that, if either had been recognized as an effective treatment, the COVID vaccine might not have qualified for emergency-use authorization.

Without emergency authorization, billions of dollars could not have been spent on the vaccine.

If these business owners can run successful businesses, why can't they adjust their immigration status and become legal immigrants?

The Biden administration created a three-year pilot program for Medicare Part D prescription-drug plans that was supposed to continue through 2027.

They did not want prescription-drug premiums to increase during an election year, so they threw money at the problem. Trump is ending the third year of the program, which means premiums could increase in 2027.

The only issue is that the insurance companies have already submitted their bids for 2027, so I am thinking the larger increase may not happen until 2028.

We will see.

Why do reporters believe that undocumented spouses of American citizens should not be arrested and deported?

This is what the country voted for.

How do you know you are getting old?

Dear Abby began her column in 1956. Her daughter, Jeanne Phillips, took it over in 1987—39 years ago—and has now announced her retirement.

That tells you that you are getting old.

Over the years, people have been confused about whether my newsletter is called Alan's One-Minute Issue or GOP Made Simple.

To end the confusion, we are going to use Alan's One-Minute Issue as the only name. We will also be changing our email domain to OneMinuteIssue.com and sending the newsletter through a new CRM system.

Wish me luck as we try to make all of that happen.

Sidney Shachnow was a Jew imprisoned in the Kovno concentration camp. Only about 5% of the original prisoners were still alive.

He immigrated to the United States and enlisted in the U.S. Army as a private. He eventually retired as a two-star general who had commanded thousands of American troops.

May his memory be a blessing.

In 1948, David Ben-Gurion sent Golda Meir to the United States to raise money for Israel's War of Independence. Her goal was to raise a few million dollars.

Within a few weeks, she raised \$50 million—and this was in 1948.

Ask how much the supporters of Palestine donate.

Just remember: While you are teaching your children to be tolerant of other people's beliefs, some of those people are training their children to kill yours.

Europe is beginning to understand.

After the Berlin car attack, members of the gay community began speaking out about importing Islamists into the West. At the same time, members of the political left within the gay community continue to say that Islamists must be embraced.

This may be the beginning of a split. Eventually, the gay-rights movement may divide over this issue.

Where is the safest place for American aircraft and military equipment in the Middle East?

Israel.

The United States is moving military equipment to Israel because no other country in the region can match Israel's defensive capabilities.

If you do not live near a Culver's restaurant, you do not know what you are missing.

Everything on the menu is good, but the best part is watching older people and younger people eat frozen custard. Everyone looks like a happy six-year-old while eating it.

I have a few thoughts about Anthony Fauci taking the Fifth Amendment before Congress.

Because he received a pardon, he should lose the right to invoke the Fifth Amendment regarding the pardoned conduct.

Congress should come down on him like a ton of bricks. The Democrats will either join in or defend him, and that could become an issue in the next election.

Republicans believe they have the evidence necessary to show that Fauci knowingly profited from COVID policies and helped impose tremendous suffering on the American people.

Mothers and grandmothers died alone in nursing homes and hospitals because their families were not allowed to be with them.

Let the Democrats defend him.

To receive reparations, people may be required to produce documentation proving their ancestry back to the 1800s.

But requiring identification to vote is considered unreasonable?

When arguing with liberals on Facebook, ask them to post something specific.

Posting "The CDC sucks" does not explain anything.

Stop arguing about vague generalities and demand specifics. You will often discover that they cannot discuss the details because they do not know them.

In the old days, people could stereotype.

For example, every barber in New York during the 1930s and 1940s seemed to be Italian. End of story.

What you may not know is that the Italian barbers in New York were organized into a union by either Abe or Moishe—two Jews who organized all the Italians.

Moishe was my grandfather. May he rest in peace.

In theory, Hamas has agreed to full disarmament. This is a major part of Trump's 20-point plan.

Let's watch and see what happens.

Hamas is accepting the deal because it has been annihilated, and the people involved in the October 7 attack are being hunted down and killed.

No one will invest a dollar in rebuilding Gaza unless Hamas is removed and a plan is created to change the situation permanently.

One of the most beautiful places in Israel is the Bahá'í Gardens in Haifa. Look them up. They are incredible.

In 1980, the Bahá'í community felt safe enough in Israel to build the gardens. Before that, its members had faced persecution.

If Palestine is ever "freed," the gardens could be destroyed or neglected, along with the Western Wall Plaza and the Church of the Holy Sepulcher, where Jesus is believed to have risen from the dead.

Sign in a synagogue:

"When you enter the synagogue, you may hear the call of God. However, he is probably not calling you on your cellphone, so please turn it off.

"If you need to talk to God, choose a quiet place.

"If you would like to see Him, send him a text message while you are driving."

They are saying that Hamas has more than 60,000 rifles in the Gaza Strip.

Why doesn't the Board of Peace confiscate the rifles and send them to the Iranian protesters?

That sounds like a win-win proposition. We will even pay for them.

During the war in Serbia, the United States would spend approximately \$5 million on a missile to destroy a Yugo, which was basically the equivalent of a Serbian tank.

I always said it would make more sense to send someone in, buy the tank, hold it until the war was over, and then sell it back to the other side at a profit.

We could have saved a great deal of money.

A friend explained his position to a Jewish Ph.D.:

"I may not like everything Donald Trump does, but he does not want dead Jews.

"Nothing else matters."

Israel has vowed that, within a decade, it will produce stealth fighter jets and unmanned bombers domestically and achieve defense independence.

Unintended consequence:

Israel will eventually sell its defense technology to the rest of the world.

Death notices released by Hamas show that 18 people identified as doctors, nurses, or hospital employees were also members of militant organizations.

Israel does not kill doctors because they are doctors. It targets militants.

The influx of illegal immigrants into Spain, encouraged by the Spanish Prime Minister, may help break up the European Union.

Italy is beginning to push for Spain to be removed from the Schengen open-borders agreement.

Republicans should show footage of the invasion of Spain on a continuous loop.

That could help flip the 2026 midterm elections.

There appears to be a clothing brand called FARM: " Father's Against Raising Morons."

The short videos are amazing, because they are so realistic. The Left truly are morons.

A postal employee was charged with stealing a letter containing a winning lottery ticket. She was arrested and charged.

How many mail-in ballots disappear in similar ways?

On October 7, Noa Marciano was taken hostage in Israel.

A doctor allegedly murdered her by injecting air into her veins inside Al-Shifa Hospital. Her family was then sent a video of her murder.

These are some of the "doctors" people are defending in Gaza.

May her memory be a blessing.

During the arrest of a woman in Texas, her fiancé was screaming, "What did she do?"

ICE responded that she had been convicted of assault with a deadly weapon and had previously been deported.

ICE is not simply arresting law-abiding immigrants. This also serves as a reminder: Know the person you are planning to marry.

Remember when they tried to destroy your life if you did not get the vaccine, but then allowed millions of undocumented immigrants into the country without requiring them to be vaccinated?

I have never understood police videos in which every officer has a gun drawn, yet no one fires, while a dangerous driver causes an incredible amount of damage.

Why have your guns drawn if you are not prepared to use them?

How much damage should someone be allowed to cause behind the wheel, before the police use deadly force?

Headline: "ICE Arrests Johns Hopkins Researcher on Domestic Flight."

Her visa had expired. She allowed it to expire.

My wife was an immigrant, and there was nothing more important to her than keeping her visa current. If she needed to leave the country and return legally, she did so.

Why do people find this so difficult, especially those holding prestigious positions such as a researcher at Johns Hopkins?

Is Palestine one country or two?

There is the West Bank, and there is Gaza.

Give the people in the West Bank the option of absorbing everyone from Gaza, just as Israel absorbed Jews who were displaced throughout the Middle East.

Israel could then cancel all work permits and prohibit anyone from the West Bank from entering Israel.

The West Bank would never accept this arrangement. Its residents value being able to enter Israel, earn money in Israel, and operate businesses connected to Israel.

Before October 7, Palestinians from the West Bank had greater freedom to enter Israel. Today, that access is severely restricted. Allow large numbers of Gazans into the West Bank, and it could be eliminated entirely.

Even the Palestinians in the West Bank do not want to absorb the Gazans.

This is why the slogan "Free Palestine" is bogus.

Some people claim that only 251,000 Jews died in the Holocaust. They simply make up this number.

At Buchenwald, the camp leadership kept meticulous records, which were later used at the war-crimes tribunals. Buchenwald alone accounted for 250,000 deaths, without counting Auschwitz or the other concentration and death camps.

When people claim that six million deaths were impossible, remember that this is why Yad Vashem exists. The testimonies, names, documents, and evidence of the victims' lives are preserved there.

My Uncle Sam, may his memory be a blessing, was imprisoned in four concentration camps and survived.

To me, the only sport worse to watch than soccer, is golf.

I understand that the president recently played a very difficult course and won an over-70 championship.

Meanwhile, the liberal media would like you to believe that he is a docile old fool. Congratulations President Trump.

I got a lot of calls last week about the almost free or free home health care plan. Unfortunately the plan is not available in the State of Florida.

Because of a benefit with prescription drugs, we don't know how they do it, but the plan can be free. See the ad for more information and please call.

Meme of the Week:
Vegan ribs are surprisingly delicious and easy to prepare.

The only problem is hunting down a vegan.

Bonus Meme of the Week:
Grandkids: the reward for not strangling your teenagers.
